

ACT Releases Twin-Disc Clutch Kits for the 2016-2017 Chevrolet Camaro SS

LANCASTER, CALIF. (May 11, 2017) — Advanced Clutch Technology (ACT) is pleased to introduce its new high performance twin-disc clutch kits for the 2016-2017 Camaro SS.

ACT twin-disc clutch kits offer a wide range of street-friendly to race-ready options with torque capacities ranging from 875-1515 ft.-lbs. These kits offer two discs, which results in nearly twice the disc surface area compared to a conventional clutch design, and that means better wear characteristics, a higher heat capacity and longer life. The twin-disc kits include ACT's proprietary Positive Lift Floater system, which automatically compensates for disc wear.

Each kit offers a choice of three different clamp load designs to give unparalleled performance and moderate pedal effort. Users also have the option of choosing disc combinations that feature high torque capacities along with smooth consistent engagement. In addition to the variety of options for these kits, they are completely serviceable. All twin-disc kits can be sent back to ACT's manufacturing facility for resurfacing, component replacement and rebalancing, which is performed at a fraction of the cost.

Included in ACT twin-disc kits is a CNC-machined and dynamically balanced forged Chromoly flywheel to ensure smooth, trouble-free installation and years of continued service.

As with all ACT clutches and flywheels, these kits are backed by a 1 year manufacturer's warranty against factory defects. ACT is proud of the quality of their product and stands behind every kit they make. For more information about ACT's warranty please visit: www.advancedclutch.com/warranty

ACT TWIN-DISC CLUTCH KITS

ACT's twin-disc kits are a perfect complement to an already expansive catalog of over 2,100 performance clutch kits and components for more than 6,500 different applications. ACT clutches deliver the maximum holding power through applying a series of sound engineering advancements to new — not rebuilt — components that maximize load and reduce flex. The result is maximum torque capacity, long life and clean, fast shifting.

The company's product line features clutches and forged flywheels for the most popular vehicles in the domestic, import, European and truck markets. ACT is headquartered in Lancaster, Calif.
